

MOHAMMED RIYAZ

Java Full Stack Developer | Java | Spring Boot | Hibernate | React

+91 9611512767 | riyazkarnad5@gmail.com | linkedin.com/in/mohammedriyazba564721b | github.com/MOHAMMED-RIYAZ

SUMMARY

Java Full Stack Developer with 1+ year of experience building enterprise applications using Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, and React. Experienced in developing backend services, implementing secure and maintainable APIs, database integration, unit testing, and Docker-based development. Currently contributing to production features and backend modernization for an enterprise banking platform serving a leading Australian bank.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C#,Python

Frontend: ReactJS, HTML5, CSS3, Bootstrap

Backend: Spring Boot, Spring Data JPA, Hibernate, REST APIs, Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL, SQL Server

Security: JWT Authentication, Role-Based Access Control (RBAC)

Testing and API Tools: Maven, JUnit, Unit Testing, Postman, Bruno, Swagger/OpenAPI

Architecture and Concepts: MVC, Microservices, OOP, SOLID Principles, Design Patterns, Data Structures and Algorithms

Cloud and DevOps: AWS, Docker, Git, GitHub, Jenkins, GitHub Actions, CI/CD

Tools and Process: Claude Code, ChatGPT, GitHub Copilot, JIRA, Confluence, Agile/Scrum, SDLC ,Perplexity, Google Gemini,Visual Studio

EXPERIENCE

Assistant System Engineer — Tata Consultancy Services (TCS), Bangalore, India

Jun 2025 – Present

- Delivered Java Spring Boot REST API features for an enterprise banking platform serving a leading Australian bank, improving feature delivery efficiency through backend optimization and reusable service components.
- Built 3+ production backend endpoints in Java Spring Boot, enforcing strict HTTP conventions, input validation, and Spring Security best practices to ensure reliable, secure data handling.
- Implemented Hibernate ORM and Spring Data JPA for efficient data access, entity modeling, and transaction management within backend banking services.
- Introduced a Controller-Service-Repository architecture in Spring Boot with Hibernate ORM and centralized exception handling, cutting bug resolution time by 25% and improving code readability team-wide.
- Used Maven for dependency management and build automation, and wrote unit tests with JUnit and Mockito to improve code reliability and catch regressions early.
- Led the migration and modernization of a legacy backend application to a current framework version, improving long-term maintainability — recognized with client appreciation for the effort.
- Set up Docker containerization for a legacy backend service, cutting local environment setup time by ~50% and enabling consistent builds across the team.
- Collaborated in an Agile team — managing Git source control, driving code reviews, and supporting QA across sprint cycles.

Full Stack Web Developer Intern — Swizosoft, Mangaluru, India

Feb 2024 – Mar 2024

- Built responsive React web apps with consistent rendering across desktop and mobile devices.
- Cut codebase size by 25% through logic restructuring and component extraction, reducing onboarding time for new developers.
- Diagnosed and resolved production bugs, shipping hotfixes that improved application reliability.

EDUCATION

B.E. in Computer Science and Engineering, Sahyadri College of Engineering and Management

2020 – 2024

CGPA: 8.65

PROJECTS

E-Commerce Application

React, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack e-commerce application with product catalog, shopping cart, order management, and user profile workflows.
- Designed RESTful APIs and implemented JWT authentication and role-based access control for protected resources.
- Designed MongoDB schemas for products, orders, users, and transactions and tested APIs using Postman.

Enterprise Service Request Management System (ESRMS)

Spring Boot, JPA, Hibernate, MySQL

- Developed a backend application for service request creation, assignment, status tracking, approval workflows, and resolution.
- Implemented Spring Data JPA and Hibernate for entity relationships, database access, and transaction management with MySQL.
- Applied DTOs, validation, centralized exception handling, normalized schemas, foreign keys, and indexed queries for reliable API and database operations.

CERTIFICATIONS

- Udemy – The Complete Web Development Bootcamp
- Eduureka – Java Full Stack Development
